

Artificial Intelligence

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

1. Questions and Answers – History – 1

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “History – 1”.

1. In LISP, the function returns the list that results after the first element is removed (the rest of the list), is

- a) car
- b) last
- c) cons
- d) cdr

View Answer

Answer: d

Explanation: None.

2. Output segments of Artificial Intelligence programming contain(s)

- a) Printed language and synthesized speech
- b) Manipulation of physical object
- c) Locomotion
- d) All of the mentioned

View Answer

Answer: d

Explanation: None.

3. LISP was created by:

- a) John McCarthy
- b) Marvin Minsky
- c) Alan Turing

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

d) Allen Newell and Herbert Simon

View Answer

Answer: a

Explanation: None.

4. Expert Ease was developed under the direction of:

a) John McCarthy

b) Donald Michie

c) Lofti Zadeh

d) Alan Turing

View Answer

Answer: b

Explanation: None.

5. An Artificial Intelligence system developed by Terry A. Winograd to permit an interactive dialogue about a domain he called blocks-world.

a) SHRDLU

b) SIMD

c) BACON

d) STUDENT

View Answer

Answer: a

Explanation: None.

6. MLMenu, a natural language interface for the TI Explorer, is similar to:

a) Ethernet

b) NaturalLink

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

c) PROLOG

d) The Personal Consultant

View Answer

Answer: b

Explanation: None.

7. Strong Artificial Intelligence is

a) the embodiment of human intellectual capabilities within a computer

b) a set of computer programs that produce output that would be considered to reflect intelligence if it were generated by humans

c) the study of mental faculties through the use of mental models implemented on a computer

d) all of the mentioned

View Answer

Answer: a

Explanation: None.

8. The traditional way to exit and LISP system is to enter

a) quit

b) exit

c) bye

d) ok

View Answer

Answer: b

Explanation: None.

9. In which of the following situations might a blind search be acceptable?

a) real-life situation

- b) complex game
- c) small search space
- d) all of the mentioned

View Answer

Answer: c

Explanation: None.

10. What is Artificial intelligence?

- a) Putting your intelligence into Computer
- b) Programming with your own intelligence
- c) Making a Machine intelligent
- d) Playing a Game

View Answer

Answer: c

Explanation: Because AI is to make things work automatically through machine without using human effort. Machine will give the result with just giving input from human. That means the system or machine will act as per the requirement.

advertisement

11. Which search method takes less memory?

- a) Depth-First Search
- b) Breadth-First search
- c) Optimal search
- d) Linear Search

View Answer

Answer: a

Explanation: Depth-First Search takes less memory since only the nodes on the current path are stored, but in Breadth First Search, all of the tree that has generated must be stored.

12. A heuristic is a way of trying

- a) To discover something or an idea embedded in a program
- b) To search and measure how far a node in a search tree seems to be from a goal
- c) To compare two nodes in a search tree to see if one is better than the other is
- d) All of the mentioned

View Answer

Answer: d

Explanation: In a heuristic approach, we discover certain idea and use heuristic functions to search for a goal and predicates to compare nodes.

13. How do you represent “All dogs have tails”?

- a) $\forall x: \text{dog}(x) \rightarrow \text{tail}(x)$
- b) $\forall x: \text{dog}(x) \rightarrow \text{tail}(y)$
- c) $\forall x: \text{dog}(y) \rightarrow \text{tail}(x)$
- d) $\forall x: \text{dog}(x) \rightarrow \text{tail}(x)$

View Answer

Answer: a

Explanation: We represent the statement in mathematical logic taking ‘x’ as Dog and which has tail. We cannot represent two variable x, y for the same object Dog that has tail. The symbol “ $\forall$ ” represent all.

14. Which is not a property of representation of knowledge?

- a) Representational Verification
- b) Representational Adequacy
- c) Inferential Adequacy
- d) Inferential Efficiency

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

View Answer

Answer: a

Explanation: There is nothing to go for Representational verification; the verification comes under Representational adequacy.

2. Questions and Answers – History – 2

This set of Artificial Intelligence Questions and Answers for Experienced people focuses on “History of AI – 2”.

1. A series of Artificial Intelligence systems, developed by Pat Langley to explore the role of heuristics in scientific discovery is _____

- a) RAMD
- b) BACON
- c) MIT
- d) DU

View Answer

Answer: b

Explanation: None.

2. A.M. Turing developed a technique for determining whether a computer could or could not demonstrate the artificial Intelligence, Presently, this technique is called

- a) Turing Test
- b) Algorithm
- c) Boolean Algebra
- d) Logarithm

View Answer

Answer: a

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

Explanation: None.

3. A Personal Consultant knowledge base contain information in the form of:

- a) parameters
- b) contexts
- c) production rules
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

4. Which approach to speech recognition avoids the problem caused by the variation in speech patterns among different speakers?

- a) Continuous speech recognition
- b) Isolated word recognition
- c) Connected word recognition
- d) Speaker-dependent recognition

View Answer

Answer: d

Explanation: None.

5. Which of the following, is a component of an expert system?

- a) inference engine
- b) knowledge base
- c) user interface
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

6. A computer vision technique that relies on image templates is:

- a) edge detection
- b) binocular vision
- c) model-based vision
- d) robot vision

View Answer

Answer: c

Explanation: None.

7. DARPA, the agency that has funded a great deal of American Artificial Intelligence research, is part of the Department of:

- a) Defense
- b) Energy
- c) Education
- d) Justice

View Answer

Answer: a

Explanation: None.

8. Which of these schools was not among the early leaders in Artificial Intelligence research?

- a) Dartmouth University
- b) Harvard University
- c) Massachusetts Institute of Technology
- d) Stanford University

View Answer

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

Answer: b

Explanation: None.

9. A certain Professor at the Stanford University coined the word ‘artificial intelligence’ in 1956 at a conference held at Dartmouth college. Can you name the Professor?

- a) David Levy
- b) John McCarthy
- c) Joseph Weizenbaum
- d) Hans Berliner

View Answer

Answer: b

Explanation: None.

10. In LISP, the function (copy-list <list>)

- a) returns a new list that is equal to <list> by copying the top-level element of <list>
- b) returns the length of <list>
- c) returns t if <list> is empty
- d) all of the mentioned

View Answer

Answer: a

Explanation: None.

11. Who is the “father” of artificial intelligence?

- a) Fisher Ada
- b) John McCarthy
- c) Allen Newell
- d) Alan Turning

View Answer

Answer: a

Explanation: None.

12. In 1985, the famous chess player David Levy beat a world champion chess program in four straight games by using orthodox moves that confused the program. What was the name of the chess program?

- a) Kaissa
- b) CRAY BLITZ
- c) Golf
- d) DIGDUG

View Answer

Answer: b

Explanation: None.

advertisement

13. The explanation facility of an expert system may be used to:

- a) construct a diagnostic model
- b) expedite the debugging process
- c) explain the system's reasoning process
- d) expedite the debugging process & explain the system's reasoning process

View Answer

Answer: d

Explanation: None.

14. A process that is repeated, evaluated, and refined is called:

- a) diagnostic

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

- b) descriptive
- c) interpretive
- d) iterative

View Answer

Answer: d

Explanation: None.

15. Visual clues that are helpful in computer vision include:

- a) color and motion
- b) depth and texture
- c) height and weight
- d) color and motion, depth and texture

View Answer

Answer: d

Explanation: None.

3. Questions and Answers – History – 3

This set of AI Interview Questions and Answers for freshers focuses on “History of AI – 3”.

1. The conference that launched the AI revolution in 1956 was held at:

- a) Dartmouth
- b) Harvard
- c) New York
- d) Stanford

View Answer

Answer: a

Explanation: None.

2. Texas Instruments Incorporated produces a low-cost LISP machine called:

- a) The Computer-Based Consultant
- b) The Explorer
- c) Smalltalk
- d) The Personal Consultant

View Answer

Answer: b

Explanation: None.

3. When a top-level function is entered, the LISP processor do(es)

- a) It reads the function entered
- b) It evaluates the function and the function's operands
- c) It prints the results returned by the function
- d) All of the mentioned

View Answer

Answer: d

Explanation: None.

4. One method of programming a computer to exhibit human intelligence is called modeling or:

- a) simulation
- b) cognitization
- c) duplication
- d) psychic amelioration

View Answer

Answer: a

Explanation: None.

5. Graphic interfaces were first used in a Xerox product called:

- a) InterLISP
- b) Ethernet
- c) Smalltalk
- d) ZetaLISP

View Answer

Answer: c

Explanation: None.

6. The AI researcher who co-authored both the Handbook of Artificial Intelligence and The Fifth Generation is:

- a) Bruce Lee
- b) Randy Davis
- c) Ed Feigenbaum
- d) Mark Fox

View Answer

Answer: c

Explanation: None.

7. Which of the following is being investigated as a means of automating the creation of a knowledge base?

- a) automatic knowledge acquisition
- b) simpler tools
- c) discovery of new concepts

d) all of the mentioned

View Answer

Answer: d

Explanation: None.

8. The CAI (Computer-Assisted Instruction) technique based on programmed instruction is:

a) frame-based CAI

b) generative CAI

c) problem-solving CAI

d) intelligent CAI

View Answer

Answer: a

Explanation: None.

9. A robot's "arm" is also known as its:

a) end effector

b) actuator

c) manipulator

d) servomechanism

View Answer

Answer: c

Explanation: None.

10. KEE is a product of:

a) Teknowledge

b) IntelliCorp

c) Texas Instruments

d) Tech knowledge

View Answer

Answer: b

Explanation: None.

11. In LISP, the function $X(x) = (2x+1)$ would be rendered as

a) `(lambda (x) (+(*2 x)1))`

b) `(lambda (x) (+1 (* 2x)`

c) `(+ lambda (x) 1 (*2x))`

d) `(* lambda(x) (+2×1)`

View Answer

Answer: a

Explanation: None.

12. A natural language generation program must decide:

a) what to say

b) when to say something

c) why it is being used

d) both what to say & when to say something

View Answer

Answer: a

Explanation: None.

advertisement

13. The hardware features of LISP machines generally include:

- a) large memory and a high-speed processor
- b) letter-quality printers and 8-inch disk drives
- c) a mouse and a specialized keyboard
- d) large memory and a high-speed processor & a mouse and a specialized keyboard

View Answer

Answer: d

Explanation: None.

14. In which of the following areas may ICAI programs prove to be useful?

- a) educational institutions
- b) corporations
- c) department of Defense
- d) all of the mentioned

View Answer

Answer: a

Explanation: None.

15. A network with named nodes and labeled arcs that can be used to represent certain natural language grammars to facilitate parsing.

- a) Tree Network
- b) Star Network
- c) Transition Network
- d) Complete Network

View Answer

Answer: c

Explanation: None.

4. Questions and Answers – Linguistics

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “Linguistics”.

1. Which of the following is true related to ‘Satisfiable’ property?

- a) A statement is satisfiable if there is some interpretation for which it is false
- b) A statement is satisfiable if there is some interpretation for which it is true
- c) A statement is satisfiable if there is no interpretation for which it is true
- d) A statement is satisfiable if there is no interpretation for which it is false

View Answer

Answer: b

Explanation: ‘Satisfiable’ property is a statement is satisfiable if there is some interpretation for which it is true.

2. Two literals are complementary if

- a) They are equal
- b) They are identical and of equal sign
- c) They are identical but of opposite sign
- d) They are unequal but of equal sign

View Answer

Answer: c

Explanation: Two literals are complementary if They are identical but of opposite sign.

3. Consider a good system for the representation of knowledge in a particular domain. What property should it possess?

- a) Representational Adequacy

- b) Inferential Adequacy
- c) Inferential Efficiency
- d) All of the mentioned

View Answer

Answer: d

Explanation: Consider a good system for the representation of knowledge in a particular domain. The properties should be Representational Adequacy, Inferential Adequacy, Inferential Efficiency and Acquisitional Efficiency.

4. What is Transposition rule?

- a) From $P \rightarrow Q$, infer $\sim Q \rightarrow P$
- b) From $P \rightarrow Q$, infer $Q \rightarrow \sim P$
- c) From $P \rightarrow Q$, infer $Q \rightarrow P$
- d) From $P \rightarrow Q$, infer $\sim Q \rightarrow \sim P$

View Answer

Answer: d

Explanation: Transposition rule- From $P \rightarrow Q$, infer $\sim Q \rightarrow \sim P$.

5. Third component of a planning system is to

- a) Detect when a solution has been found
- b) Detect when solution will be found
- c) Detect whether solution exists or not
- d) Detect whether multiple solutions exist

View Answer

Answer: a

Explanation: Third component of a planning system is to detect when a solution has been found.

6. Which of the following is true in Statistical reasoning?

- a) The representation is extended to allow some kind of numeric measure of certainty to be associated with each statement
- b) The representation is extended to allow 'TRUE or FALSE' to be associated with each statement
- c) The representation is extended to allow some kind of numeric measure of certainty to be associated common to all statements
- d) The representation is extended to allow 'TRUE or FALSE' to be associated common to all statements

View Answer

Answer: a

Explanation: Statistical reasoning is the representation is extended to allow some kind of numeric measure of certainty to be associated with each statement.

7. In default logic, we allow inference rules of the form

- a) $(A : B) / C$
- b) $A / (B : C)$
- c) A / B
- d) $A / B : C$

View Answer

Answer: a

Explanation: In default logic, we allow inference rules of the form: $(A : B) / C$.

advertisement

8. In Bayes theorem, what is the meant by $P(H_i|E)$?

- a) The probability that hypotheses H_i is true given evidence E
- b) The probability that hypotheses H_i is false given evidence E
- c) The probability that hypotheses H_i is true given false evidence E
- d) The probability that hypotheses H_i is false given false evidence E

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

View Answer

Answer: a

Explanation: In Bayes theorem, $P(H_i|E)$ is the probability that hypotheses H_i is true given evidence E .

9. Default reasoning is another type of

- a) Monotonic reasoning
- b) Analogical reasoning
- c) Bitonic reasoning
- d) Non-monotonic reasoning

View Answer

Answer: d

Explanation: Default reasoning is another type of non-monotonic reasoning.

10. Generality is the measure of

- a) Ease with which the method can be adapted to different domains of application
- b) The average time required to construct the target knowledge structures from some specified initial structures
- c) A learning system to function with unreliable feedback and with a variety of training examples
- d) The overall power of the system

View Answer

Answer: a

Explanation: Generality is the measure of ease with which the method can be adapted to different domains of application.

5. Questions and Answers – Artificial Intelligence Agents

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “Artificial Intelligence Agents”.

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

1. The performance of an agent can be improved by

- a) Learning
- b) Observing
- c) Perceiving
- d) None of the mentioned

View Answer

Answer: a

Explanation: An agent can improve by saving the previous states on which it was earlier, hence in future it can learn to respond in the same situation better.

2. External actions of the agent is selected by

- a) Perceive
- b) Performance
- c) Learning
- d) Actuator

View Answer

Answer: b

Explanation: Depends on how you want to improve and what the performance measures are.

3. The action of the Simple reflex agent completely depends upon

- a) Perception history
- b) Current perception
- c) Learning theory
- d) Utility functions

View Answer

Answer: b

Explanation: These agents select actions based on the current perception, ignoring the rest of the perception history.

4. Following could be the approaches to Artificial Intelligence

- a) Strong Artificial Intelligence
- b) Weak Artificial Intelligence
- c) Applied Artificial Intelligence
- d) All of the mentioned

View Answer

Answer: d

Explanation: Strong Artificial Intelligence aims to build machines that can truly reason and solve problems.

Weak Artificial Intelligence deals with the creation of some form of computer-based artificial intelligence that cannot truly reason and solve problems, but can act as if it were intelligent.

Applied Artificial Intelligence aims to produce commercially viable “smart” systems.

In Cognitive Artificial Intelligence approach, a computer is used to test theories about how the human mind works.

5. An Artificial Neural Network Is based on

- a) Strong Artificial Intelligence approach
- b) Weak Artificial Intelligence approach
- c) Cognitive Artificial Intelligence approach
- d) Applied Artificial Intelligence approach

View Answer

Answer: c

Explanation: In Cognitive Artificial Intelligence approach, a computer is used to test theories about how the human mind works—for example, theories about how we recognize faces and other objects, or about how we solve abstract problems.

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

6. The Face Recognition system is based on

- a) Strong Artificial Intelligence approach
- b) Weak Artificial Intelligence approach
- c) Cognitive Artificial Intelligence approach
- d) Applied Artificial Intelligence approach

View Answer

Answer: d

Explanation: Applied Artificial Intelligence approach aims to produce commercially viable “smart” systems such as, for example, a security system that is able to recognize the faces of people who permitted to enter a particular building. Applied Artificial Intelligence has already enjoyed considerable success.

7. A completely automated chess engine (Learn from previous games) is based on

- a) Strong Artificial Intelligence approach
- b) Weak Artificial Intelligence approach
- c) Cognitive Artificial Intelligence approach
- d) Applied Artificial Intelligence approach

View Answer

Answer: a

Explanation: Strong Artificial Intelligence aims to build machines that can truly reason and solve problems. These machines must be self-aware and their overall intellectual ability needs to be indistinguishable from that of a human being. Strong Artificial Intelligence maintains that suitably programmed machines are capable of cognitive mental states.

advertisement

8. A basic line following robot is based on

- a) Strong Artificial Intelligence approach
- b) Weak Artificial Intelligence approach

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

- c) Cognitive Artificial Intelligence approach
- d) Applied Artificial Intelligence approach

View Answer

Answer: b

Explanation: Weak Artificial Intelligence deals with the creation of some form of computer-based artificial intelligence that cannot truly reason and solve problems, but can act as if it were intelligent. Weak Artificial Intelligence holds that suitably programmed machines can simulate human cognition.

9. The following task/tasks Artificial Intelligence could not do yet

- a) Understand natural language robustly
- b) Web mining
- c) Construction of plans in real time dynamic systems
- d) All of the mentioned

View Answer

Answer: d

Explanation: These are the areas in which needs more focus for improvements.

10. What among the following is/are the example of the intelligent agent/agents?

- a) Human
- b) Robot
- c) Autonomous Spacecraft
- d) All of the mentioned

View Answer

Answer: d

Explanation: Humans can be looked upon as agents. They have eyes, ears, skin, taste buds, etc. for sensors; and hands, fingers, legs, mouth for effectors. Robots are agents. Robots may have camera, sonar,

infrared, bumper, etc. for sensors. They can have grippers, wheels, lights, speakers, etc. for actuators. Autonomous Spacecraft takes decision on its own based on perceptions.

6. Questions and Answers – Facts – 1

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “Facts – 1”.

1. When talking to a speech recognition program, the program divides each second of your speech into 100 separate:

- a) Codes
- b) Phonemes
- c) Samples
- d) Words

View Answer

Answer: c

Explanation: None.

2. Which term is used for describing the judgmental or commonsense part of problem solving?

- a) Heuristic
- b) Critical
- c) Value based
- d) Analytical

View Answer

Answer: a

Explanation: None.

3. Which stage of the manufacturing process has been described as “the mapping of function onto form”?

- a) Design
- b) Distribution

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

c) Project management

d) Field service

View Answer

Answer: a

Explanation: None.

4. Which kind of planning consists of successive representations of different levels of a plan?

a) hierarchical planning

b) non-hierarchical planning

c) all of the mentioned

d) project planning

View Answer

Answer: a

Explanation: None.

5. What was originally called the “imitation game” by its creator?

a) The Turing Test

b) LISP

c) The Logic Theorist

d) Cybernetics

View Answer

Answer: a

Explanation: None.

6. Decision support programs are designed to help managers make:

a) budget projections

- b) visual presentations
- c) business decisions
- d) vacation schedules

View Answer

Answer: c

Explanation: None.

7. PROLOG is an AI programming language, which solves problems with a form of symbolic logic known as predicate calculus. It was developed in 1972 at the University of Marseilles by a team of specialists. Can you name the person who headed this team?

- a) Alain Colmerauer
- b) Niklaus Wirth
- c) Seymour Papert
- d) John McCarthy

View Answer

Answer: a

Explanation: None.

8. Programming a robot by physically moving it through the trajectory you want it to follow be called:

- a) contact sensing control
- b) continuous-path control
- c) robot vision control
- d) pick-and-place control

View Answer

Answer: b

Explanation: None.

9. To invoke the LISP system, you must enter

- a) AI
- b) LISP
- c) CL (Common Lisp)
- d) Both LISP and CL

View Answer

Answer: b

Explanation: None.

10. In LISP, the function (list-length <list>)

- a) returns a new list that is equal to <list> by copying the top-level element of <list>
- b) returns the length of <list>
- c) returns t if <list> is empty
- d) all of the mentioned

View Answer

Answer: b

Explanation: None.

11. ART (Automatic Reasoning Tool) is designed to be used on:

- a) LISP machines
- b) Personal computers
- c) Microcomputers
- d) All of the mentioned

View Answer

Answer: a

Explanation: None.

12. Which particular generation of computers is associated with artificial intelligence?

- a) Second
- b) Fourth
- c) Fifth
- d) Third

View Answer

Answer: c

Explanation: None.

advertisement

13. Shaping teaching techniques to fit the learning patterns of individual students is the goal of:

- a) decision support
- b) automatic programming
- c) intelligent computer-assisted instruction
- d) expert systems

View Answer

Answer: c

Explanation: None.

14. Which of the following function returns t If the object is a symbol in LISP?

- a) (* <object>)
- b) (symbolp <object>)
- c) (nonnumeric <object>)
- d) (constantp <object>)

View Answer

Answer: b

Explanation: None.

15. The symbols used in describing the syntax of a programming language are

- a) 0
- b) {}
- c) ""
- d) <>

View Answer

Answer: d

Explanation: None.

7. Questions and Answers – Facts – 2

This set of Artificial Intelligence Questions and Answers for Freshers focuses on “Facts – 2”.

1. Ambiguity may be caused by:

- a) syntactic ambiguity
- b) multiple word meanings
- c) unclear antecedents
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

2. Which company offers the LISP machine considered “the most powerful symbolic processor available”?

- a) LMI
- b) Symbolics
- c) Xerox
- d) Texas Instruments

View Answer

Answer: b

Explanation: None.

3. What of the following is considered a pivotal event in the history of Artificial Intelligence?

- a) 1949, Donald O, The organization of Behavior
- b) 1950, Computing Machinery and Intelligence
- c) 1956, Dartmouth University Conference Organized by John McCarthy
- d) 1961, Computer and Computer Sense

View Answer

Answer: c

Explanation: None.

4. Natural language processing is divided into the two subfields of:

- a) symbolic and numeric
- b) time and motion
- c) algorithmic and heuristic
- d) understanding and generation

View Answer

Answer: c

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

Explanation: None.

5. High-resolution, bit-mapped displays are useful for displaying:

- a) clearer characters
- b) graphics
- c) more characters
- d) all of the mentioned

View Answer

Answer: c

Explanation: None.

6. A bidirectional feedback loop links computer modeling with:

- a) artificial science
- b) heuristic processing
- c) human intelligence
- d) cognitive science

View Answer

Answer: c

Explanation: None.

7. Which of the following have people traditionally done better than computers?

- a) recognizing relative importance
- b) finding similarities
- c) resolving ambiguity
- d) all of the mentioned

View Answer

Answer: c

Explanation: None.

8. In LISP, the function evaluates both and is

- a) set
- b) setq
- c) add
- d) eva

View Answer

Answer: a

Explanation: None.

9. Which type of actuator generates a good deal of power but tends to be messy?

- a) electric
- b) hydraulic
- c) pneumatic
- d) both hydraulic & pneumatic

View Answer

Answer: b

Explanation: None.

10. Research scientists all over the world are taking steps towards building computers with circuits patterned after the complex interconnections existing among the human brain's nerve cells. What name is given to such type of computers?

- a) Intelligent computers
- b) Supercomputers
- c) Neural network computers
- d) Smart computers

View Answer

Answer: c

Explanation: None.

advertisement

11. The integrated circuit was invented by Jack Kilby of:

- a) MIT
- b) Texas Instruments
- c) Xerox
- d) All of the mentioned

View Answer

Answer: b

Explanation: None.

12. People overcome natural language problems by:

- a) grouping attributes into frames
- b) understanding ideas in context
- c) identifying with familiar situations
- d) both understanding ideas in context & identifying with familiar situations

View Answer

Answer: d

Explanation: None.

13. The Cedar, BBN Butterfly, Cosmic Cube and Hypercube machine can be characterized as

- a) SISD

- b) MIMD
- c) SIMD
- d) MISD

View Answer

Answer: b

Explanation: None.

14. A series of AI systems, developed by Pat Langley to explore the role of heuristics in scientific discovery is _____

- a) RAMD
- b) BACON
- c) MIT
- d) DU

View Answer

Answer: b

Explanation: None.

8. Questions and Answers – Facts – 3

This set of Artificial Intelligence Interview Questions and Answers focuses on “Facts – 3”.

1. Nils Nilsson headed a team at SRI that created a mobile robot named:

- a) Robotics
- b) Dedalus
- c) Shakey
- d) Vax

View Answer

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

Answer: c

Explanation: None.

2. An Artificial Intelligence technique that allows computers to understand associations and relationships between objects and events is called:

- a) heuristic processing
- b) cognitive science
- c) relative symbolism
- d) pattern matching

View Answer

Answer: c

Explanation: None.

3. The new organization established to implement the Fifth Generation Project is called:

- a) ICOT (Institute for New Generation Computer Technology)
- b) MITI (Ministry of International Trade and Industry)
- c) MCC (Microelectronics and Computer Technology Corporation)
- d) SCP (Strategic Computing Program)

View Answer

Answer: a

Explanation: None.

4. The field that investigates the mechanics of human intelligence is:

- a) history
- b) cognitive science
- c) psychology
- d) sociology

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

View Answer

Answer: b

Explanation: None.

5. What is the name of the computer program that simulates the thought processes of human beings?

- a) Human logic
- b) Expert reason
- c) Expert system
- d) Personal information

View Answer

Answer: c

Explanation: None.

6. What is the name of the computer program that contains the distilled knowledge of an expert?

- a) Database management system
- b) Management information System
- c) Expert system
- d) Artificial intelligence

View Answer

Answer: c

Explanation: None.

7. Claude Shannon described the operation of electronic switching circuits with a system of mathematical logic called:

- a) LISP
- b) XLISP
- c) Neural networking

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

d) Boolean algebra

View Answer

Answer: c

Explanation: None.

8. A computer program that contains expertise in a particular domain is called an:

a) intelligent planner

b) automatic processor

c) expert system

d) operational symbolizer

View Answer

Answer: c

Explanation: None.

9. What is the term used for describing the judgmental or commonsense part of problem solving?

a) Heuristic

b) Critical

c) Value based

d) Analytical

View Answer

Answer: a

Explanation: None.

10. What was originally called the “imitation game” by its creator?

a) The Turing Test

b) LISP

c) The Logic Theorist

d) Cybernetics

View Answer

Answer: a

Explanation: None.

advertisement

11. Decision support programs are designed to help managers make:

a) budget projections

b) visual presentations

c) business decisions

d) vacation schedules

View Answer

Answer: c

Explanation: None.

12. Programming a robot by physically moving it through the trajectory you want it to follow is called:

a) contact sensing control

b) continuous-path control

c) robot vision control

d) pick-and-place control

View Answer

Answer: b

Explanation: None.

9. Questions and Answers – Facts – Human-machine interaction

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “Facts – Human-machine interaction”.

1. The primary interactive method of communication used by humans is:

- a) reading
- b) writing
- c) speaking
- d) all of the mentioned

View Answer

Answer: c

Explanation: None.

2. Elementary linguistic units which are smaller than words are:

- a) allophones
- b) phonemes
- c) syllables
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

3. In LISP, the atom that stands for “true” is

- a) t
- b) ml

- c) y
- d) time

View Answer

Answer: a

Explanation: None.

4. A mouse device may be:

- a) electro-chemical
- b) mechanical
- c) optical
- d) both mechanical and optical

View Answer

Answer: d

Explanation: None.

5. An expert system differs from a database program in that only an expert system:

- a) contains declarative knowledge
- b) contains procedural knowledge
- c) features the retrieval of stored information
- d) expects users to draw their own conclusions

View Answer

Answer: b

Explanation: None.

6. Arthur Samuel is linked inextricably with a program that played:

- a) checkers

- b) chess
- c) cricket
- d) football

View Answer

Answer: a

Explanation: None.

7. Natural language understanding is used in:

- a) natural language interfaces
- b) natural language front ends
- c) text understanding systems
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

advertisement

8. Which of the following are examples of software development tools?

- a) debuggers
- b) editors
- c) assemblers, compilers and interpreters
- d) all of the mentioned

View Answer

Answer: d

Explanation: None.

9. The first AI programming language was called:

- a) BASIC
- b) FORTRAN
- c) IPL(Inductive logic programming)
- d) LISP

View Answer

Answer: d

Explanation: None.

10. The Personal Consultant is based on:

- a) EMYCIN
- b) OPS5+
- c) XCON
- d) All of the mentioned

View Answer

Answer: d

Explanation: None.

10. Questions and Answers – Machine Learning

This set of Artificial Intelligence Multiple Choice Questions & Answers (MCQs) focuses on “Machine Learning”.

1. Machine learning is

- a) The autonomous acquisition of knowledge through the use of computer programs
- b) The autonomous acquisition of knowledge through the use of manual programs

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

- c) The selective acquisition of knowledge through the use of computer programs
- d) The selective acquisition of knowledge through the use of manual programs

View Answer

Answer: a

Explanation: Machine learning is the autonomous acquisition of knowledge through the use of computer programs.

2. Factors which affect the performance of learner system does not include

- a) Representation scheme used
- b) Training scenario
- c) Type of feedback
- d) Good data structures

View Answer

Answer: d

Explanation: Factors which affect the performance of learner system does not include good data structures.

3. Different learning methods does not include

- a) Memorization
- b) Analogy
- c) Deduction
- d) Introduction

View Answer

Answer: d

Explanation: Different learning methods does not include introduction.

4. In language understanding, the levels of knowledge that does not include

- a) Phonological
- b) Syntactic
- c) Empirical
- d) Logical

View Answer

Answer: c

Explanation: In language understanding, the levels of knowledge that does not include empirical knowledge.

5. A model of language consists of the categories which does not include

- a) Language units
- b) Role structure of units
- c) System constraints
- d) Structural units

View Answer

Answer: d

Explanation: A model of language consists of the categories which does not include structural units.

6. What is a top-down parser?

- a) Begins by hypothesizing a sentence (the symbol S) and successively predicting lower level constituents until individual preterminal symbols are written
- b) Begins by hypothesizing a sentence (the symbol S) and successively predicting upper level constituents until individual preterminal symbols are written
- c) Begins by hypothesizing lower level constituents and successively predicting a sentence (the symbol S)
- d) Begins by hypothesizing upper level constituents and successively predicting a sentence (the symbol S)

View Answer

Answer: a

For Computer Lecturer Test Pdf Download <https://www.doc4shares.com/ppsc-lecturer-of-computer-science-solved-past-papers-mcqs-and-test-preparation-data-in-pdf.php>

Explanation: A top-down parser begins by hypothesizing a sentence (the symbol S) and successively predicting lower level constituents until individual preterminal symbols are written.

7. Among the following which is not a horn clause?

a) p

b) $\emptyset p \vee q$

c) $p \rightarrow q$

d) $p \rightarrow \emptyset q$

View Answer

Answer: d

Explanation: $p \rightarrow \emptyset q$ is not a horn clause.

advertisement

8. The action 'STACK(A, B)' of a robot arm specify to

a) Place block B on Block A

b) Place blocks A, B on the table in that order

c) Place blocks B, A on the table in that order

d) Place block A on block B

View Answer

Answer: d

Explanation: The action 'STACK(A,B)' of a robot arm specify to Place block A on block B.
